OPEC: Nigeria, Other African Nations Need \$92bn in Refining Investments Through 2050 – This Day

The Organisation of Petroleum Exporting Countries (OPEC) has projected that Nigeria and other African countries will require about \$92 billion in refining investments through 2050 to meet rising fuel demand, strengthen energy security and reduce dependence on imported petroleum products. In its 2026 World Oil Outlook (WOO), the international oil cartel also identified Nigeria and Angola as the principal drivers of the continent's next wave of refining expansion. OPEC stated that Africa's refining sector is entering a new phase of growth after decades of underinvestment, with Nigeria playing a central role through the fully operational Dangote Refinery and the proposed 200,000 barrels per day Akwa Ibom refinery project being developed by BUA Group, alongside several modular refining projects. External reserves hit CBN's \$51.04bn target as Naira posts weekly loss – Business Day

The Naira ended the week weaker across foreign exchange (FX) market segments amid slowing market liquidity, despite Nigeria's external reserves rising to the Central Bank of Nigeria's (CBN) projected target of \$51.04 billion. Data published by the CBN showed that the Naira depreciated by N6.68, representing a 0.48 per cent week-on-week decline, as the dollar was quoted at N1,370.46 on Friday at the Nigerian Foreign Exchange Market (NFEM), compared with N1,363.83 recorded on Thursday. IMF backs further electricity reforms to tackle subsidies – Punch

The International Monetary Fund has urged the Federal Government to deepen reforms in the electricity sector, warning that the country's continued practice of charging tariffs below cost-recovery levels is creating significant financial losses and exposing public finances to growing fiscal risks. The recommendation was contained in the IMF's 2026 Article IV Consultation Report on Nigeria, which our correspondent analysed on Saturday, following discussions with senior government officials, lawmakers, labour representatives, private-sector stakeholders and development partners. NCC, CAC Tighten Rules On Telecom Ownership Changes, Require Prior Approval – Leadership

The Nigerian Communications Commission (NCC) and the Corporate Affairs Commission (CAC) have introduced stricter compliance measures requiring telecommunications companies to obtain regulatory approval before effecting significant changes in their ownership structure. Under the new directive, any transfer of shares amounting to 10 per cent or more in a company licensed by the NCC must secure a Letter of No Objection from the telecom regulator before the transaction can be registered by the CAC. The requirement, which takes immediate effect, was jointly announced by both agencies in a statement issued on Sunday, marking a major regulatory shift for telecom operators and investors.
